IGEL and Login VSI Maximize Endpoint Performance and Availability

IGEL Integrates Login Enterprise into IGEL OS 11.03

IGEL, provider of the next-gen edge OS for cloud workspaces and Login VSI, the company dedicated to maximizing the end-user experience have combined forces. Login Enterprise Launchers are now completely integrated into the IGEL endpoint.

Login VSI maximizes the end-user computing experience on all IGEL OS-powered endpoints. Automatically testing and validating the impact of change in any physical, virtual and cloud-based workspaces, Login Enterprise ensures application and desktop performance.

The combined solution enables IT organizations to leverage their IGEL infrastructure to continuously test the performance and availability of virtual and cloud workspaces. The combination of IGEL and Login VSI enables customers to gain a holistic view of productivity resources 24x7x365, giving them visibility into performance and availability changes.

What does it mean to you?

Customers can now visualize performance degradation and proactively address issues before they impact the business - saving the enterprise time and money.

Availability of Solution

The Login Enterprise Launcher in IGEL OS 11.03 and greater can be accessed by the Login Enterprise Virtual Appliance and then activated using Jobs to schedule virtual user sessions to run to collect performance and availability information. From start to finish, it only takes a few minutes to fully configure the Launcher which can then be deployed remotely for quick tests to watch for changes that may impact SLAs.
