

NEAR REAL-TIME, CLEAN ASSET DATA FOR BETTER DECISIONS AND A PROVABLE REDUCTION OF RISK

ApexaiQ® is a SaaS based, agentless, and **continuous asset assurance platform** that delivers your IT-risk, obsolescence, maintenance, vulnerability impact, and compliance in a single dashboard measured with your ApexaiQ® risk score.

Gain control of your

Orphaned Assets

Obsolescence

Maintenance

Vulnerability Impact

Compliance QA

4 steps to reduce technology risk

1. Visibility

ApexaiQ discovers and catalogs every asset on your network. On-premises, co-located and cloud.

2. Enrich

Assets are enriched with information, giving you clean, actionable data.

3. Assess Risk

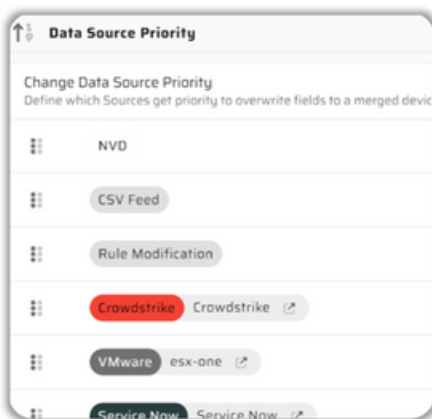

View security gaps & set benchmarks using all of Apexa's data points.

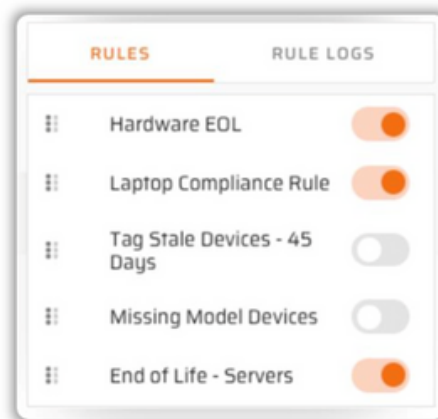

4. Action

Know what requires action to make life cycle improvements, reduce technical debt, & eliminate security risks.

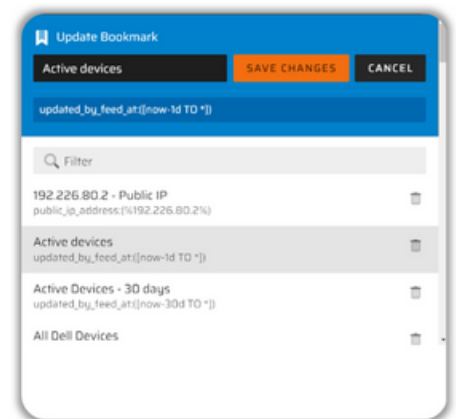

Better data for better decisions

Prioritization

Configurable Rules

Robust Queries

By gathering information from all of your data sources and enhancing it with pertinent details including obsolescence (HW, OS, and SW), maintenance, vulnerabilities, and compliance, ApexaiQ uncovers your security gaps and reduce technology risks. ApexaiQ provides near real-time information and a provable risk score to safeguard your business.
