

Clean asset data for better decisions and a provable reduction of risk with IGEL and ApexaiQ®

InfoSec and asset management teams struggle to reduce their cyber risk due to the lack of an effective system to track and verify all assets. With numerous different tool sets across a technology environment and multiple teams managing different data points, the manual collection process is often daunting, making it difficult to deliver business-aligned insights through data-driven decision support for optimal operations and security.

IGEL and ApexaiQ help organizations by streamlining technology asset management processes and providing true levels of asset risk across the environment. The ApexaiQ platform provides a cutting-edge, near-real-time solution that offers clean asset data tailored to individual business needs with an advanced layer of asset intelligence and security analytics. ApexaiQ is a comprehensive asset assurance platform that addresses the limitations of traditional IT asset management (ITAM) solutions. It offers intelligent data prioritization through advanced analytics, a rules-based automation engine for real-time risk detection, automated asset tagging capabilities, and comprehensive data querying features. These differentiators enable organizations to gain unprecedented visibility, control, and optimization over their IT asset ecosystem, unlocking the true value of their asset data.

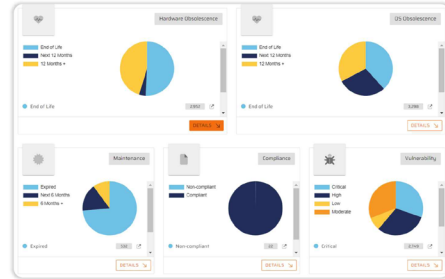

This approach combined with IGEL's Preventative Security Model and the management offered by the IGEL Universal Management Suite offer critical insights into your IGEL'd endpoints and beyond.

IGEL is the Secure Endpoint OS for Now and Next

IGEL is a transformative, secure endpoint OS designed for SaaS and secure browser workflows to support the ways our customers work. IGEL's endpoint strategy for now and next enables enterprise IT to deliver secure, cloud-based digital workspaces that provide increased choice, security, and efficiency at lower costs.

ApexaiQ is the Leading Platform Offering Clean Asset Data, Enabling Organizations to Make Better Decisions and Offers a Provable Reduction of Risk

ApexaiQ is a SaaS-based, agentless, and continuous asset assurance platform that empowers you with the confidence to make better data-driven decisions and take automated action to reduce your risk. Managing IGEL OS devices alongside other assets has never been easier — ApexaiQ streamlines asset management through its automated tagging capabilities. By dynamically categorizing assets based on predefined rules and machine learning algorithms, ApexaiQ eliminates the need for manual tagging, ensuring accurate and up-to-date asset classifications.

Key Features

- Secure read-only OS for delivering cloud-based digital workspaces
- SaaS based agentless platform provides true level of risk across the technology landscape
- Real time proactive inventory management for all technology assets
- Create configurable rules and asset tags to automate manual work

Key Benefits

- Reduce risk by eliminating endpoint vulnerabilities
- Proactive inventory management
- Ease of endpoint management
- Reduce operational disruptions and ensure business continuity

IGEL and ApexaiQ help organizations:

The ApexaiQ platform offers proactive inventory management for technology assets with clean, trusted data that is highly customized and organized to boost organizational effectiveness with increased IT asset knowledge.

IGEL onboarding service enables new users or IGEL OS endpoints to be securely onboarded to the organization within minutes without IT involvement. Once onboarded into an organization's environment, information on IGEL devices is available on the ApexaiQ platform.

ApexaiQ provides organizations with real-time asset insights for our hardware, software, OS, and the configurations across all of your assets, enabling IT leaders to assess overall technology risk, identify security weaknesses, and establish performance standards using comprehensive data points for improved security posture.

IGEL's Preventative Security Model™ reduces risk by eliminating the endpoint vulnerabilities that are often exploited by attackers. Rather than a monitor – detect – remediate model that requires multiple layers of security and management agents, the IGEL PSM removes the vulnerabilities and the need for costly and complex tools.

IGEL helps to decrease endpoint TCO by as much as 75% by reducing add-on management and security agents and optimizing hardware.

ApexaiQ® is an IGEL Ready partner and works seamlessly with IGEL OS

ApexaiQ®'s SaaS based, agentless platform with an advanced layer of asset intelligence and security analytics runs seamlessly in the background of IGEL OS collecting data and displaying it in a single dashboard measured with an ApexaiQ risk score. For organizations who are looking to modernize their endpoint strategy and minimize risk, IGEL and ApexaiQ offer joint value in security, risk mitigation, and manageability.

Simplified Endpoint Management

IT operations are simplified with IGEL OS and ApexaiQ. With IGEL's cloud management platform that defines access and policies and a small endpoint footprint which minimizes the need for and size of updates, while the cloud hosted Universal Management Suite (UMS) is a single point of management and monitoring for all endpoints. The ApexaiQ platform enhances endpoint management by pulling data from IGELd and all other devices on the network displaying all asset information in a single pane of glass and assessing a risk score to reduce operational disruptions and ensure business continuity.

Sustainability

IGEL positively impacts the sustainability goals of organizations by reducing e-waste, decreasing power consumption, and extending the device lifecycle. With ApexaiQ, leverage extended data to effectively manage end-of-life/support, warranties, maintenance contracts, vulnerabilities, and compliance standards, empowering you to maximize your technology spend, optimize your operations, and achieve your sustainability goals.

About IGEL Ready

IGEL Ready is an exclusive technology partner program designed to enable hardware, software and IT peripheral companies to develop verified, integrated solutions with IGEL products. IGEL Ready focuses primarily on identifying recommended partner products and solutions that are trusted and verified to work with IGEL OS. All products featured in IGEL Ready have completed rigorous verification testing, thereby providing our joint customers confidence in our combined solution compatibility and effectiveness

About ApexaiQ®

ApexaiQ® is a SaaS-based, agentless, and continuous asset assurance platform that empowers you with the confidence to make better data-driven decisions and take automated action to reduce your risk. With Apexa's advanced layer of asset intelligence and security analytics asset data is deduplicated, prioritized, and enriched to include obsolescence, warranty, vulnerability, and compliance information in a single dashboard measured with your ApexaiQ® risk score.
